Williams Scotsman Provides Turn-Key Modular Solutions for Healthcare Sector Needs
Company Offers Flexibility and Quality Design to Healthcare Service Community

Baltimore, Maryland – February 22, 2006 – Williams Scotsman announces its continued commitment to providing the healthcare community with space solutions that incorporate innovation and best practices in therapeutic environmental design, supported by the company's participation in the 2006 International Conference and Exhibition on Health Facility Planning, Design and Construction (PDC) in San Diego this month. Williams Scotsman's experience in the design, construction and installation of healthcare facilities spans a broad variety of building applications. From dialysis facilities to diagnostic imaging centers, from swing space to clinical applications, the company's experience and breadth of solution meet the ever-changing needs of the healthcare community. Williams Scotsman manages the development of large permanent modular building projects from initial design to delivery, the installation of permanent structures, and has been a leading mobile office and storage product provider throughout North America for over 50 years. The flexibility of modular space is particularly well-suited to the medical and healthcare delivery community, enabling renovations and expansion of healthcare networks with minimal interruptions to operations.

Further sustaining the company's commitment is the recent appointment of Keven O'Brien as Williams Scotsman's Healthcare Director. O'Brien brings 16 years of experience in the modular industry, as well as strong technical knowledge and alliance development skills. O'Brien will ultimately be responsible for strategic relationship development with healthcare procurement groups, equipment manufacturers, and customers. The confluence of U.S. population demographics, technological advances, and consumer expectations for healthcare services has led McGraw Hill Construction to predict double digit growth in hospital and clinical buildings square footage this year. Modular buildings are an efficient solution to deliver quality space in accelerated timeframes.

"The creation of the Healthcare Director role centralizes the company's focus on healthcare and positions Williams Scotsman as a major force in this particular industry. While modular healthcare solutions are still in their infancy, healthcare construction is a large market that is ripe for the development of new building solutions, enabling faster occupancy and revenue generation for highly technical healthcare delivery services," stated Joe Lopardo, Vice President for Williams Scotsman.

Williams Scotsman will exhibit at the 2006 PDC Conference at the San Diego Convention Center in booth number 629.

About Williams Scotsman International, Inc.

Williams Scotsman International, Inc., headquartered in Baltimore, Maryland, is a leading provider of mobile and modular space solutions for the Construction, Education, Commercial, Healthcare
