**Williams Scotsman Acquires GE Modular Space's
Fleet of Single-Wide and Double-Wide California DSA Classrooms**

Baltimore, MD – Williams Scotsman has purchased GE Modular Space's fleet of California single-wide and double-wide "Division of State Architects" (DSA) classrooms. GE Modular Space, a unit of GE Equipment Services, will continue to serve the California education market with a focus on larger complex structures.

Most of the DSA classroom units acquired by Williams Scotsman, nearly 3,800, are under lease to K-12 public schools throughout Northern, Central and Southern California. The addition of these units to Williams Scotsman's existing relocatable classroom fleet will further establish the company's position as one of the largest lease classroom providers in California and the United States.

"For many years, we have been committed to assisting California's educators with overcrowding by providing fast, safe and affordable relocatable classrooms. We're very pleased this acquisition will allow us to introduce many new schools to our dedicated family of employees and our commitment to quality customer service."

Bob Hansen – Williams Scotsman, Vice
President – Western Region

"The acquisition of GE's California single-wide and double-wide DSA fleet offers significant strategic benefits to Williams Scotsman, enhancing our value to our stock holders and investors."

Gerard Holthaus – Williams Scotsman,
Chairman, President and
Chief Executive Officer
