

WILLSCOT

**APPLYING INNOVATIVE THINKING TO
BETTER MEET OUR CUSTOMER'S NEEDS.**

FLEXING THE BOUNDARIES OF TEMPORARY SPACE

When you need a temporary space solution that offers maximum flexibility and design configuration, choose FLEX™. Our panelized product offers a new, flexible, portable space solution and is:

Eliminate unnecessary waste with a smaller footprint and up to 75% faster setup times than traditional temporary solutions.

Enjoy a bright, professional environment with a fresh, innovative design – both inside and out.

With ground-level access and a robust frame, FLEX was designed with your employees' well-being in mind.

Remove, replace and reposition interchangeable panels to create a truly customized solution to your temporary space needs.

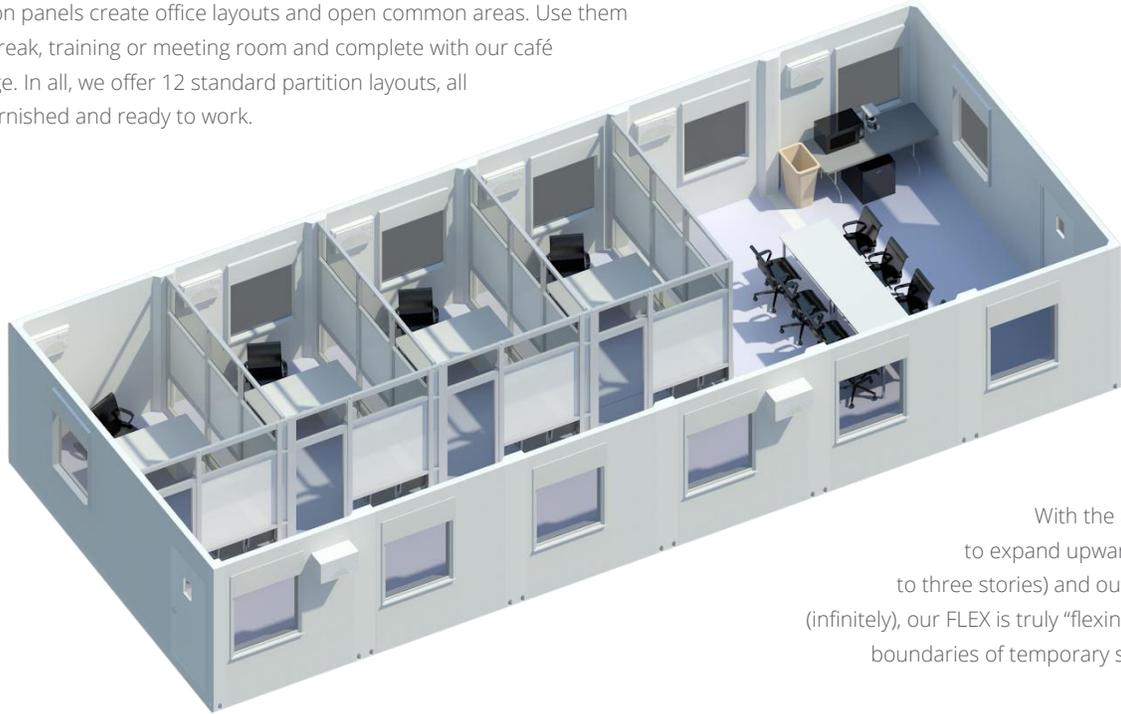

FLEX's interchangeable panels make the difference.

Each FLEX unit is built from a set of interchangeable panels that create basic layouts. Using those panels, your WillScot experts can create the arrangement that best matches your needs and vision. Can you have a door on a particular end? Can you arrange the windows to allow for more natural light in one area? Can you switch panels or add on to your FLEX at a later date? With FLEX, the answer is YES.

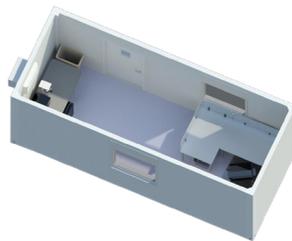

CREATE MULTIPLE WORK AREAS IN ONE SPACE

Partition panels create office layouts and open common areas. Use them for a break, training or meeting room and complete with our café package. In all, we offer 12 standard partition layouts, all fully furnished and ready to work.

With the ability to expand upward (up to three stories) and outward (infinitely), our FLEX is truly “flexing” the boundaries of temporary space.

**Simply put,
FLEX is the ideal
solution to any
relocatable
space need.**

The perfect solution for education.

FLEX' compact but efficient footprint can slip into your existing campus and provide breathing room for schools undergoing renovations or growing student populations. Keep your interior open or use panels to divide the space to match its purpose. Because of its ability to go horizontal or vertical (up to three stories high), FLEX can easily adapt to the area designated for your temporary space solution.

A versatile addition to your facility.

Put FLEX to work as an administrative office, resource center, computer lab, library or home for special curriculum activities – work with us to design a layout as imaginative as your students. The interior of FLEX is bright and clean; bring in more natural light with full length windows to create that ideal learning environment.
