

WILLSCOT

**APPLYING INNOVATIVE THINKING TO
BETTER MEET OUR CUSTOMER'S NEEDS.**

FLEXING THE BOUNDARIES OF TEMPORARY SPACE

When you need a temporary space solution that offers maximum flexibility and design configuration, choose FLEX™. Our panelized product offers a new, flexible, portable space solution and is:

EFFICIENT

Eliminate unnecessary waste with a smaller footprint and up to 75% faster setup times than traditional temporary solutions.

MODERN

Enjoy a bright, professional environment with a fresh, innovative design – both inside and out.

SAFE

With ground-level access and a robust frame, FLEX was designed with your employees' well-being in mind.

CUSTOM

Remove, replace and reposition interchangeable panels to create a truly customized solution to your temporary space needs.

FLEX's interchangeable panels make the difference.

Each FLEX unit is built from a set of interchangeable panels that create basic layouts. Using those panels, your WillScot experts can create the arrangement that best matches your needs and vision. Can you have a door on a particular end? Can you arrange the windows to allow for more natural light in one area? Can you switch panels or add on to your FLEX at a later date? With FLEX, the answer is YES.

CREATE MULTIPLE WORK AREAS IN ONE SPACE

Partition panels create office layouts and open common areas. Use them for a break, training or meeting room and complete with our café package. In all, we offer 12 standard partition layouts, all fully furnished and ready to work.

With the ability to expand upward (up to three stories) and outward (infinitely), our FLEX is truly “flexing” the boundaries of temporary space.

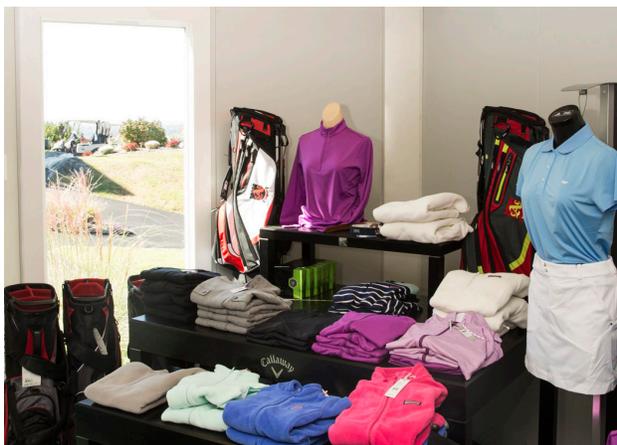

Simply put,
**FLEX is the ideal
solution to any
relocatable
space need.**

FLEX: Showcase your brand & inventory

Compact but efficient, FLEX' footprint can still pack a mighty punch in the campaign to woo more customers to your place of business. Create a welcoming atmosphere with floor length windows that allow passersby to see what you are selling. Use every inch of interior footage to display your wares. Glass or solid panels can partition an area for transactions or managers. Exterior graphics can spotlight you brand and guide customers to your location. FLEX can go horizontal or vertical (up to three stories high) so it can make as big a statement as you want to make.

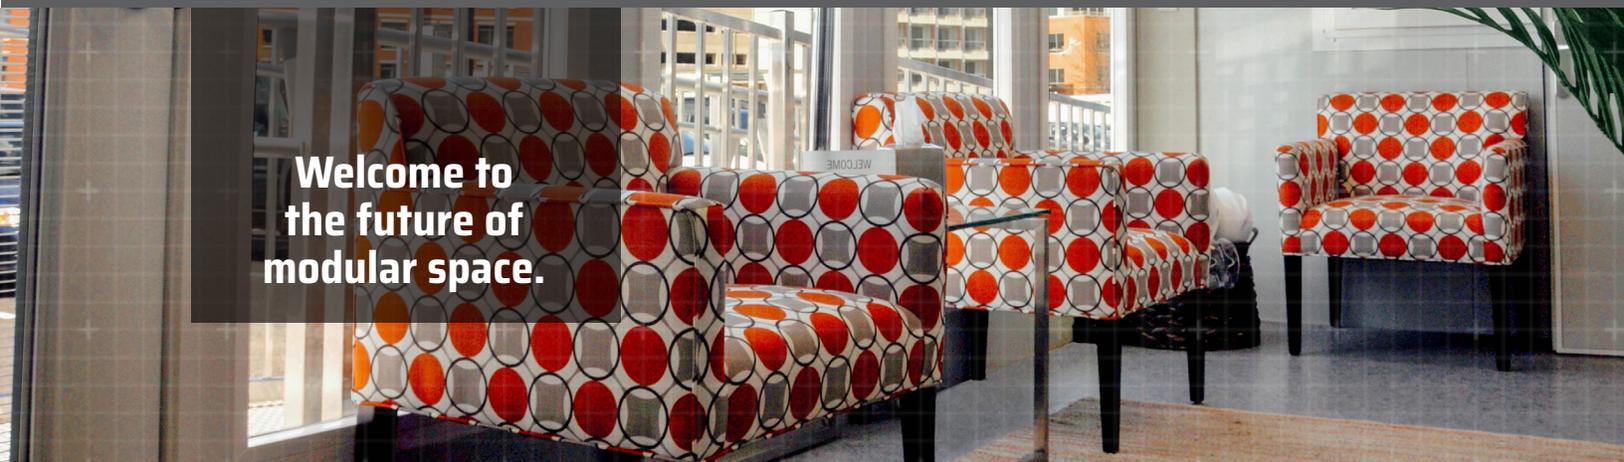

Take shopping therapy to a new level.

Put FLEX to work as a pop up store, a pro shop at a golf or tennis club, swing space for an a location undergoing renovations, or a special preview site for a business in the process of new construction. Installation is quick so you can be open for business in days rather than weeks. FLEX' bright and modern outlook will score points for design and inspire your customers to shop!
